Note: The medical profession takes the view that the parent's consent to medical treatment cannot be delegated. This view is explicit in the Children Act 1989. Thus, medical consent forms have no legal status and a doctor or nurse insisting on the consent of a parent to a particular treatment has he right to do so.

For this reason, we do not recommend that Leaders insist on parents signing the statement above. However, it can be a comfort to medical staff to have general consent in advance from parents or to have a Leader on hand able to sign forms required by medical authorities.
